

Company Profile

RANZ CONSULTANCY. Founded in 2005, we have a vision to provide affordable professional services to our clients. No matter how big or small the project, we'll always take it professionally. With our affordable rates, we aim to help small businesses succeed. We are your partners in success!

E-Commerce Solutions

Ranz Consultancy started out as an e-commerce solutions provider/consultant. The platform used is base on the popular osCommerce online merchant program. On top of providing the technical service of developing the e-commerce website (eshop), we also provide consulting to clients on the various aspects of running an e-commerce business.

Website Conceptualisation and Design

For business or organisations who would like to have a simple 'online' presence in the Internet, we provide affordable packages covering hosting, domain name registration and website development. Provide us the contents and we'll get your company and organisation up online!

Web-Programming

Custom web application development is made possible through our web-programming team. The team specialise in php/mysql programming techniques, having developed web applications for domains such as; membership administration system, registration system, voting system and tracking system.

Training

In RANZ, we believe in empowering our clients with knowledge. Instead of just providing services, we provide various training courses catered to various audiences. Some regular courses includes Basic osCommerce (eshop) Setup, HTML Website Conceptualising & Development, Photoshop/GIMP application know-hows and MS Office. Cutomised workshops/courses as per required by Clients complete with courseware development services will be provided upon request.
